

5 TIPS

for effective collaboration

Adopting a hybrid work model with the right tools in place can fundamentally change and improve your business - boosting employee productivity, cutting costs, and delivering personalized experiences for your customers.

These helpful tips can smooth the way when evaluating solutions that will drive effective collaboration for your teams.

1

Make sure video meetings are easy to use

When you can't be in the same room, a great face-to-face meeting experience is the next best thing. Video meetings help foster effective communications instantly, but they need to be:

Easy To Use

with one-click sign-on, high quality video, simple screen sharing, and intuitive controls

Easy To Integrate

with calendars and the other tools you use so there's less time wasted navigating between apps

Intuitive

so you don't miss a beat whether you're using your computer, mobile phone, or connected videoconferencing devices

2

Help teams collaborate easily

Make it easy for team members to stay on the same page using a virtual workspace that connects people with each other, and with the information they need. Look for a collaborative workspace that:

Offers secure exchange

of messages and files across devices

Makes it easy to search

the space to find conversations and files

Allows private messaging

1:1 or in groups – with anyone inside or outside your organization

Includes a digital whiteboard

for easy brainstorming

Integrates with meetings

so you can keep the collaboration going

3

Never forget about security

Small businesses can't afford to overlook security when setting up effective collaboration. You need to keep your information safe no matter where your employees are located. Look for secure collaboration solutions that:

Enable

people to your connect securely, no matter what device they're using

Keep

your conversations confidential

Verify

users, room devices and compliance with your security policies

Protect

your sensitive data with end-to-end encryption

4

Embrace simplicity

As a small business owner you want smart, secure and flexible IT solutions. To reduce IT complexity, look for solutions that:

Integrate calling, meetings and messaging - all in new app, that works seamlessly

Easy to deploy and manage without the need for onsite IT

Allow you to get up and running with the services you need today and scale up with ease as your business needs change

Offer financial flexibility, with pay-as-you-need pricing options

5

Bring out the best of hybrid work

Intelligent devices play an important role in today's hybrid work model. As people come and go to the office or work remotely, it's easy to support them with devices that improve the collaboration experience. Look for devices that:

Reduce barriers, and clutter

with desktop HD devices in personal or shared spaces

Help reduce video conferencing fatigue

with devices that deliver a 10x better experience than in-person meetings

Can turn any space into a fully functional conference space

supporting immersive experiences

Are just as easy to setup, use, and manage

as consumer devices such as smart TV's

Today's successful businesses are embracing hybrid work and supporting a mix of in-office and remote workers with secure, flexible and affordable collaboration tools.
