Microsoft Teams

Microsoft Teams Direct
Routing for GCC High

FEATURES & BENEFITS

CallTower is the only proven voice provider delivering cloud-based Direct Routing in GCC High since 2019 to support Microsoft 365 GCC High (MSFT 365 GCCH) for government contractors that work with the Department of Defense.

Modern Work

As a Solutions Gold Partner, CallTower's monitoring and management services provide the highest quality user experience.

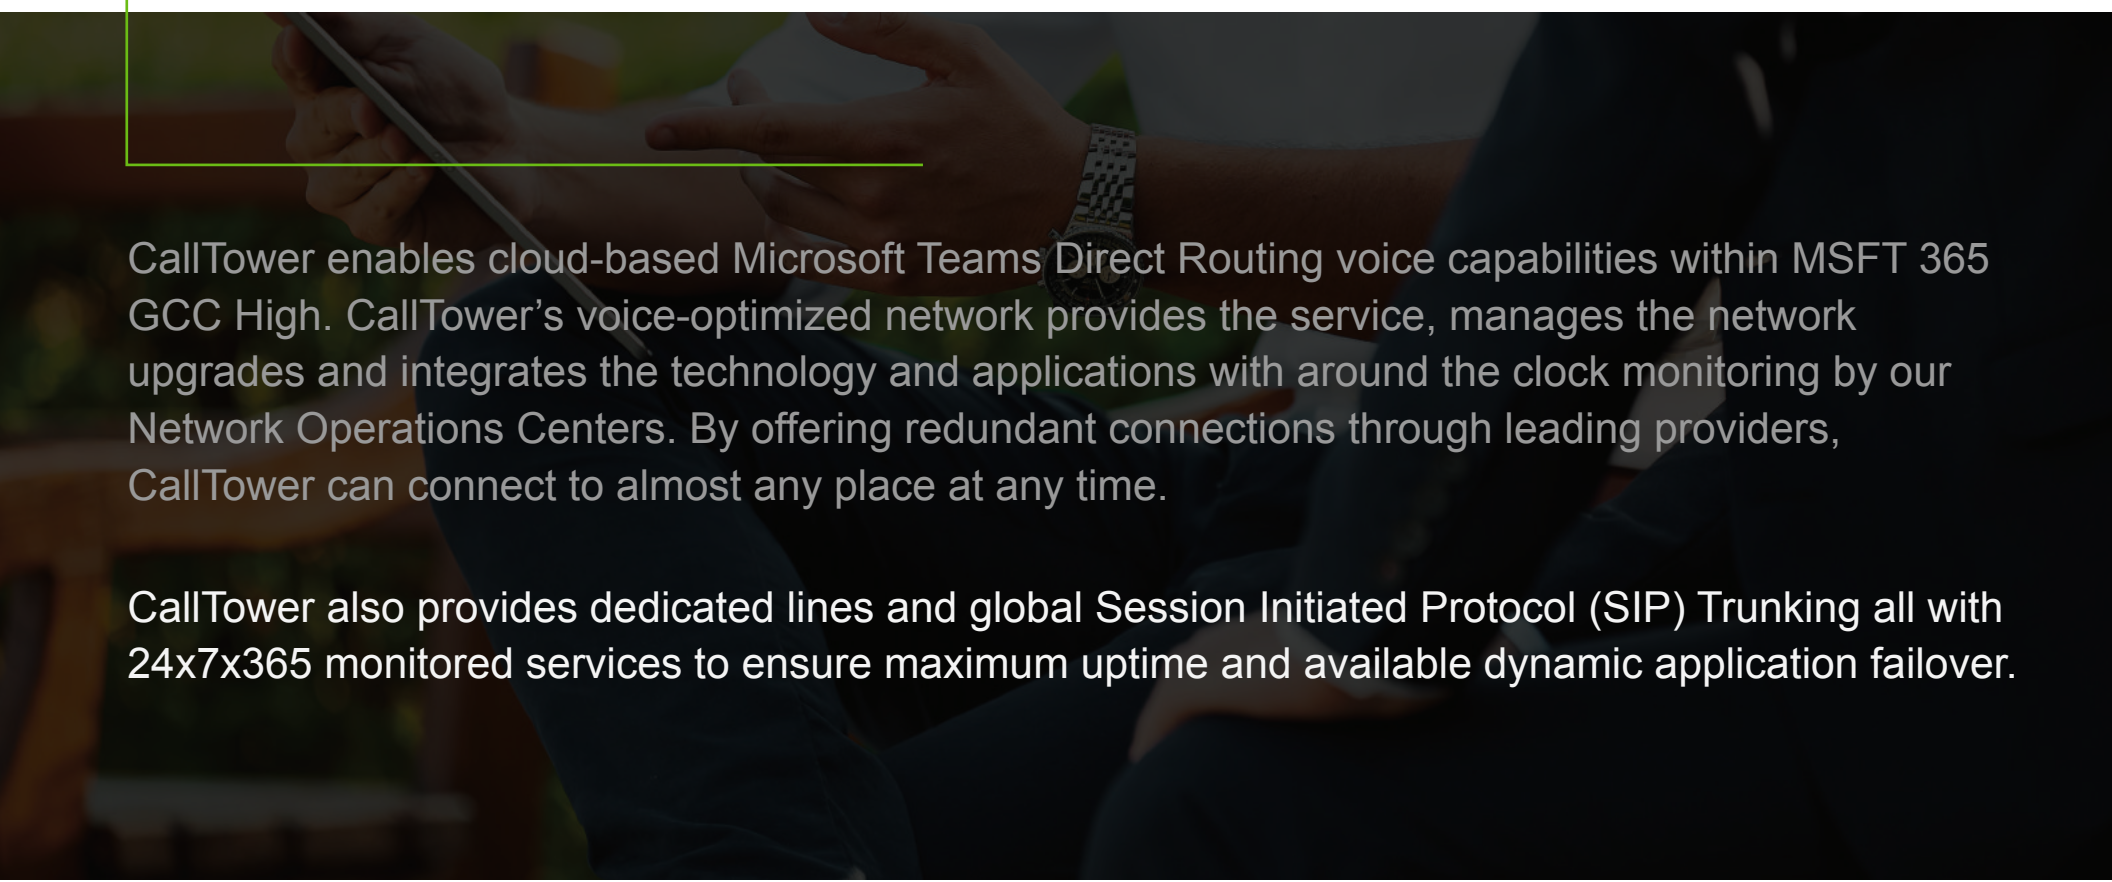

IMPROVE MSFT 365 GCC HIGH WITH CALLTOWER COLLABORATION HUB WITHIN GCC HIGH

Generally, most businesses prefer to use Microsoft Teams as their primary collaboration resource tool. After the recent updates, businesses and organizations using the GCC High edition of Microsoft 365 (M365 GCCH) have seen an increase in productivity due to the improved capabilities and functionalities that more closely reflect the commercial version.

Administrators have the ability to place restrictions on who employees can converse. Now, those organizations leveraging Microsoft 365 GCC High environments can add voice and audio conferencing to their systems with Microsoft Teams Direct Routing from CallTower.

Chats and team calls are now easier as users can directly communicate with others who are not a part of the same workplace.

Microsoft 365 GCC High meets the unique and evolving requirements of contractors holding or processing DoD controlled unclassified information (CUI), Cybersecurity Maturity Model Certification (CMMC), or subject to International Traffic in Arms Regulations (ITAR).

A person wearing a blue shirt and a silver watch is pointing at a tablet screen. The background is blurred, showing what appears to be a meeting or collaborative work environment. A thin green line is visible on the left side of the image, extending from the top text block down to the bottom text block.

CallTower enables cloud-based Microsoft Teams Direct Routing voice capabilities within MSFT 365 GCC High. CallTower's voice-optimized network provides the service, manages the network upgrades and integrates the technology and applications with around the clock monitoring by our Network Operations Centers. By offering redundant connections through leading providers, CallTower can connect to almost any place at any time.

CallTower also provides dedicated lines and global Session Initiated Protocol (SIP) Trunking all with 24x7x365 monitored services to ensure maximum uptime and available dynamic application failover.
