MS Teams Mobile

Mobile

Empower workers across all roles to elevate productivity through **improved communication and collaboration.**

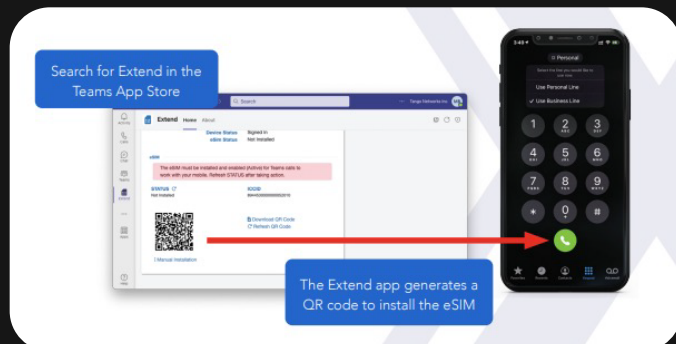

Elevate your operator Connect or Direct Routing services with the innovative Tango Extend, enabling seamless integration of Teams business lines into any mobile phone. Enjoy app-free business calling using the native phone dialer.

The Teams Mobile enables Teams Resellers and Operator Connect partners to deliver cost-effective, high-quality mobile communications to every Frontline worker effortlessly. With no additional integration needed and straightforward recurring monthly charges, reseller onboarding and implementation become swift and hassle-free.

Deployment by the Enterprise and end user is simple in **5 Easy Steps:**

The **Extend App** in the Teams App Store facilitates the Teams account pairing and installation of the eSIM:

MS Teams Mobile

Teams Mobile solves the poor user experience with calling using UC apps and has many benefits for Resellers, Enterprises of any size, and End Users.

For Resellers:

- Efficient Onboarding and Rapid Time to Market
- Compatible with existing Operator Connect & Direct Routing Calling Plans
- Straightforward Billing Process
- Compelling value proposition for your Enterprise customers

For the Enterprise:

- Simplified Management
- Native Teams solution for seamless integration
- Single business number on BYOD mobiles – accessible from anywhere
- Quick and Cost-Effective Deployment
- Unified management of fixed and mobile telephony

For End Users:

- Easy to obtain, eliminates the need for carrying two phones, office functionality in your pocket
- Superior User Experience for making calls – no additional apps required
- Top-notch voice quality assurance
- Decreases expense claims
- Secure and segregated from personal communications
