BLENDING CLOUD CONTACT CENTER.

Teams CCaaS Integration

The Five9 UC Integration with Teams enables Agent-Expert Consultation by connecting Five9 agents with Teams users throughout the organization.

Contact center agents can easily identify the right knowledge workers and subject matter experts using a Five9-Teams consolidated directory on their desktop.

Using Agent-Expert Consultation, agents have an “at-a-glance” directory on their desktop with presence status showing whether the Teams user is available, busy, away, etc. Teams users are identified by department, allowing agents to quickly find an expert to help them. Once the right expert is identified, the agent can talk with them one on one, conference them with the customer, or transfer the call. Regardless of how the call is handled, the goal is to resolve the customer’s issue the first time, every time.
