# Welcome to the Era of AI-powered Chatbots

Faster, Better and Always Available

CeeTee

Why Chatbots?

| Keep up on the go: Be present on multiple messaging platforms | Improved work efficiency | 24×7 customer support | Better lead generation |

Why Kore.ai bots?

End-to-End Integration

The only platform delivering complete end-to-end creation and integration of chatbots

Seamless Deployment Option

Offers all three deployment modes: on premise, cloud and hybrid

Language Support

ML engine supports 12 languages other than English, and will add many more...

Failure Management

Provides in-depth insights into your bot's performance for identifying intents/entity and executing tasks

Highly Customizable Platform

Complete API level control over platform using BotKit SDK and execution extensibility using web hook integrations.

Smart Bots

Intelligent chatbots that use NLP and AI to tackle tasks for the most useful enterprise functions and industries

NLP Using Multi-pronged Approach

Multi-pronged approach uses Fundamental Meaning, Machine Learning and Knowledge graph based domain ontology that allows for better conversations without all the training data

"By 2021, over **50%** of enterprises will spend more per annum on chatbot creation than traditional mobile app development"

– Gartner
