

FOR FACULTY & STAFF

Your campus runs like a city.
Your phones should too.

eSim for Teams and Webex puts one institutional number on the phone every staff member already carries.

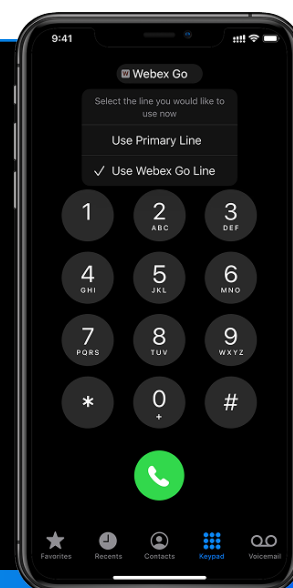

- ✓ managed
- ✓ secure
- ✓ recorded
- ✓ personal calls kept private

WHAT IS eSIM FOR TEAMS AND WEBEX?

A business-line eSIM added to any smartphone with one QR code. No app, no second device. Staff use their phone's normal dialer, and every business call runs through your existing UC platform, so it is managed, recorded and retrievable. Personal calls and data stay private.

Works with  

ISO/IEC 27001:2022 certified

Campus services

Facilities, grounds, residence and public safety teams get managed calling on any phone.

Retire legacy phones

Replace aging desk phones, DECT and POTS lines with the mobiles staff already carry.

Hybrid & remote staff

Advisors and administrators take calls on their university number from anywhere.

Research & travel

One university number worldwide, for field work, clinical rotations and conferences abroad.

Audit & continuity

Business calls captured for audits and investigations; staff stay reachable if systems fail.

Lower cost, less waste

No second handsets or phone reimbursements: one work line on each person's own phone.
